DETAILED ACTION

Claims 1, 2, 4-24, 94-106, 108-121 are pending in the case.

The following are new rejections not necessitated by amendment:

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9, 94, 102, 117, 118, rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is vague and indefinite in the recitation of “the alpha-1, 2,-mannosidase gene to be introduced is attached to a yeast endoplasmic reticulum (ER) retention signal (HDEL)(SEQ ID NO:12)”, since it is not clear if it is intended that the peptide HDEL is attached to the recited gene, or whether the polynucleotide encoding the peptide HDEL is attached to the gene.

Claims 9, 94 are vague and indefinite because they recite broad together with narrow range that falls within the broad range. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is

Art Unit: 1636

followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 9 recites the broad recitation "a yeast endoplasmic reticulum (ER) retention signal, and the claim also recites "(HDEL)", which is the narrower statement of the range/limitation. Claim 94 recites the broad recitations "OCH1 gene" and "YPS1 gene" together with the narrow recitations "(SEQ ID NO:42)" and "(SEQ ID NO:115)".

Claims 102, 117, and 118 are vague and indefinite in the recitation of "M62815", since it is not clear what is intended by this term. Furthermore, it is not clear whether the claims recite a broad limitation followed by a narrow statement of the range/limitation.

Claims 95-101, 103-106 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1, 2, 4-8, 10-24, , 108-116, 119-121 are allowed.
